REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

3 JAN 1911

Kept at Joldwynds Holmbury St Mary

in the County of Surrey

by Fredk Cornish

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 550 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Gomshall S.E.R.
Distance 4½ Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

6 JAN 1910

Kept at Hazelea, Kenley

in the County of Surrey

by Mrs Carr Dyer

RAIN GAUGE
Pattern Registered Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 281 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Kenley
Distance 5 min Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.

BRITISH RAINFALL

14 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Hazelea Kenley

in the County of Surrey 4

by Mrs Carr Dyer

RAIN GAUGE
Pattern Snowdon registered
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 281 ft.

Time of Observation 9 a.m

Nearest Railway Station
Name Kenley
Distance 5 min Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
1_ JAN 1910
162

Kept at Kew Observatory

in the County of Surrey

by The Staff

RAIN GAUGE Pattern Beckley
Diameter of top 11 in.
Height of top above Ground 1 ft. 9 in.
" " " Sea Level 19 ft.

Time of Observation 10am

Nearest Railway Station Name Richmond
Distance 3/4m Direction ESE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAINFALL.

Rain Gauge
Pattern [illegible]
Diameter of top 11 in.
Height of top above Ground 1 ft. 9 in.
" " " Sea Level 19 ft.

162

Time of Observation 10 am

Nearest Railway Station
Name Richmond
Distance 3/4 m Direction ESE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the ovious day. If an Observer prefers not to conform to this almost universal rule, he is earnestly quested to add the reading at 9 a.m. on 1st January of the following year in the space provided r it at the end of this paragraph. Full instructions for the measurement of rain, e selection and placing of rain gauges, and particulars as to the British Rainfall ganization are given in "*Rules for Rainfall Observers*," sent post-free on application to . H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

SH RAINFALL.
M A2.
JAN 1911

162

pt at Kew Observatory
the County of Surrey
The Staff

RAIN GAUGE
Pattern Beckley S.R.
Diameter of top 11 in.
Height of top above Ground 1 ft. 9 in.
" " " Sea Level 19
Time of Observation 10 a.m.
Nearest Railway Station
Name Richmond
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the evious day. If an Observer prefers not to conform to this almost universal rule, he is earnestly quested to add the reading at 9 a.m. on 1st January of the following year in the space provided it at the end of this paragraph. Full instructions for the measurement of rain, e selection and placing of rain gauges, and particulars as to the British Rainfall rganization are given in "*Rules for Rainfall Observers,*" sent post-free on application to r. H. R. MILL, 62, Camden Square, London, N.W.

COUNCIL OFFICES,
NEW MALDEN,
SURREY.

April 11th. 1910.

Dear Sir,

In reply to your letter of the 1st. instant, I have looked into the question of the rainfall return for last year, and find that the figures received by you, for the dates in question, and for the whole year are the correct ones.

Yours faithfully,

R. H. Jeffes.

Engineer & Surveyor.

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN ~~192~~ 1907.

Kept at NEW MALDEN (EDENFIELD)

in the County of EAST SURREY.

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

11 JAN 1911

Kept at Nutfield Priory

in the County of Surrey

5

by Mrs Joshua Fielden

RAIN GAUGE
Pattern Cylinder
Diameter of top 8 in.
Height of top above Ground 1 ft. 2 in.
" " " Sea Level 468 ft.

Time of Observation 9 a m

Nearest Railway Station
Name Nutfield
Distance 3/4 Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
4 JAN 1910

REGISTER OF RAINFALL IN 1909

Exd RmL

Kept at The Grange, Woking Village
in the County of Surrey
by Rev. F. Wilson

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground - ft. 6 in.
" " " Sea Level 78 ft.
Time of Observation 11 a.m.
Nearest Railway Station: Name Woking
Distance 1·75 m. Direction NNW.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

EX 95

FORM A2.
BRITISH RAINFALL
-6 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at The Grange, Woking Village

in the County of Surrey 6

by Rev. F. Wilson

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground — ft. 8 in.
„ „ „ Sea Level 78 ft.

Time of Observation 11 a.m.

Nearest Railway Station
Name Woking
Distance 1·75 m. Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

BRITISH RAINFALL.
4 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Penge = Anerley

in the County of Kent Surrey

by Penge Urban District Council

RAIN GAUGE
Pattern Casella's
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level - ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Penge L B & S C Ry
Distance 367 Direction N.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL

24 MAR 1911

Kept at Penge ANERLEY TOWN HALL

in the County of ~~Kent~~ Surrey. 3

by H. W. Longdin. Surveyor. P. U. D. C.

RAIN GAUGE
Pattern
Diameter of top .... in.
Height of top above Ground .... ft. .... in.
" " Sea Level .... ft.

Time of Observation

Nearest Railway Station
Name
Distance .... Direction

Same as last time.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.
BRITISH RAINFALL.

3 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Poylehill House. Seale

in the County of Surrey N. lat. 51°-13'-33" W. long 0-43'-16" 6

by C W Penlington Fellow R. Met. Soc.

RAIN GAUGE
Pattern Glaisher.
Diameter of top 5" in.
Height of top above Ground ft. 9 in.
" " " Sea Level 395 ft.

Time of Observation 8-45 a.m.

Nearest Railway Station
Name Tongham
Distance 1 mile Direction NW.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
8 JAN 1910

Kept at Asgarth, Riddlesdown Rd, Purley

in the County of Surrey No I

by Edmund Clark

RAIN GAUGE
Pattern Old type
Diameter of top five in.
Height of top above Ground one ft. in.
" " " Sea Level 365±10 ft.

Time of Observation 8 AM

Nearest Railway Station
Name Purley
Distance under ½ m. Direction W by N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

10 JAN 1911

Kept at Pyrford Croft, Pyrford

in the County of Surrey 6

by H W Page-Phillips Esq

RAIN GAUGE
Pattern As before
Diameter of top ...... in.
Height of top above Ground ...... ft. ...... in.
" " " Sea Level ...... ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Byfleet
Distance 1 mile Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.

17 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Redhill STATION ROAD

in the County of Surrey

by W R Fowler

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 18 ft. in.
" " " Sea Level 270 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Redhill
Distance 1/8 Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

London N.W.

Dear Sir,

Referring to yours of the 17th inst., on comparing last years records from the Castle Grounds and Sewage Disposal Works, I had myself noticed the irregularity you mention, which I found was occasioned by a new observer imperfectly understanding his instructions, and all readings since the 1st day of the New Year have been correctly recorded.

As desired, I send you the reading at 9 a.m. on January 1st /09 at the Castle Grounds, which is recorded as 0.01.

Yours faithfully

Fred T. Clayton

Borough Engineer & Surveyor

FORM A2.
BRITISH RAINFALL.

28 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Castle Grounds Reigate

in the County of Surrey.

by Fred T. Clayton C.E.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5" in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 350 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Reigate
Distance 2 Fu. Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

AIR MINISTRY.

Form 1090 **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**

(formerly B.R.O. Form A.1).

REGISTER OF RAINFALL IN 192 07.

Kept at Reigate, Mill Lawn

in the County of SURREY

by

Lat. .... Long. ....

Time of Observation ....

Nearest Railway Station ....

Diameter of Funnel of Rain Gauge .... in.

Height of top of Gauge above Ground .... ft. .... in.

" " " " Sea Level .... ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to The Superintendent, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGIS

16 JAN 1911

FORM A2.
BRITISH RAINFALL.

Kept at 285, HOLMESDALE ROAD, SOUTH NORWOOD, S.E. 3
in the County of Surrey:
by Edward A. Martin F.G.S.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. in. as before
" " Sea Level ft.
Time of Observation 9 a.m.
Nearest Railway Station: Name Norwood Junction; Distance ¾ m. Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN ~~192~~ 1907

Kept at SURBITON (SEETHING WELLS)

in the County of EAST SURREY.

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

LONDON, S.W. April 7th 1908. 19

Dear Sir,

Thank you for your letter. I have made enquiries and although the .30 inches of rain is entered as having fallen on the 24th December I have not the smallest doubt in my own mind that it is incorrect. No rain was registered at the Sewage Works, which are less than a mile away to the N. W. or at Burgh Heath four miles to the South. The total for the month should be as you say 3.21 inches.

I am very sorry to have given you this trouble and I have told the observer to be more careful in the future.

Yours faithfully,

W Vaux Graham

Dr Hugh R. Mill

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

-2 JAN 1911

Kept at Hillsboro' Camborne Road Sutton
in the County of Surrey 5
by Mr. F. E. Wright

RAIN GAUGE
Pattern Casella
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 250 ft.
Time of Observation 8·30 a m
Nearest Railway Station
Name Sutton
Distance 3/4 ml Direction NE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

ENCLO.

Dear Sir,

RAINFALL, SUTTON SEWAGE WORKS.

I am in receipt of yours of the 1st inst, with reference to the Rainfall on March 25th, 1909. I regret to find that this has been put down as ·80 ins. whereas it should have been ·08 making the total for that month 3·32 ins and shall be glad if you will make the alteration accordingly.

Yours faithfully,

C Chambers Smith

Engineer & Surveyor.

FORM A.
BRITISH RAINFALL.

3 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Upper Gatton

in the County of Surrey

by F. Druce.

Rain Gauge
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 601 ft.

Time of Observation 9 am.

Nearest Railway Station
Name Merstham Station
Distance 1½ m Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at St Ann's Heath. (Holloway Sanatorium) Virginia Water

in the County of Surrey

by Rev. John Peck. M.A. (Chaplain)

7

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 1¼ in.
" " " Sea Level abt 120 ft.

Time of Observation from 9 to 10 am. (Sundays about 11·45 am)

Nearest Railway Station
Name Virginia Water
Distance 150 yards Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

AIR MINISTRY.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 192 07.

Kept at Wallington(Cotswold)

in the County of SURREY

by

Lat.
Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at The Larches. Warlingham

in the County of Surrey. 4

by Mr. Bernard F Harris.

RAIN GAUGE
Pattern Snowden
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 615 ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Upper Warlingham
Distance 5/8 mile Direction West.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

Kept at Field Place Weybridge

in the County of Surrey

by ~~Captain~~ mrs Yool

RAIN GAUGE
Pattern Snowdon funnel by Casella
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 118 ft.

Time of Observation 9 AM.

Nearest Railway Station
Name Weybridge ~~[illegible]~~
Distance ¼ mil Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

3 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Field Place Weybridge

in the County of Surrey 6

by Captain Yool

RAIN GAUGE
Pattern Snowdon Funnel
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 118 ft.

Time of Observation 9 AM.

Nearest Railway Station
Name Weybridge
Distance 1¾ mil Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

STATION (2) Excd Rmf

FORM A2. BRITISH RAINFALL. 3 JAN 1910

Kept at Weybridge

in the County of Surrey

by H. K. G. Rogers

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 1 in.
" " " Sea Level 85 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Weybridge
Distance 1/2 mile Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

28 JAN 191

PORTMORE ROAD

Kept at "St Margarets" Weybridge

6

in the County of Surrey

by W. E. Anderson

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 47 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Weybridge
Distance 1½ Direction S.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

1 JAN 1910

Kept at Westwood - Windlesham

in the County of Surrey

by Colonel G. A. Curzon

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " " Sea Level ft.

Time of Observation 9 am

Nearest Railway Station
Name Sunningdale
Distance 1¾ mile Direction E.S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Escd Rmf

FORM A2. BRITISH RAINFALL.

1 JAN 1910

Kept at R.H.S. Gardens, Wisley, Ripley

in the County of Surrey

by Thos Frazer & W. Miles.

RAIN GAUGE
Pattern -
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 150 ft. about.

Time of Observation 9 a.m.

Nearest Railway Station
Name Byfleet.
Distance 3 Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.
